Date: May 12, 2026

Dear Gaurav Kumar Mishra,

We are pleased to offer you the position of **Network Security & IT Infrastructure Internship** at **Pacific Office Care Pvt. Ltd.** for a period of three (3) months, commencing from May 15, 2026.

This engagement is structured as a hands-on Systems Engineering Program, conducted in an on-site deployment mode, where network architecture, cybersecurity controls, and enterprise software administration are integrated within the same tenure.

Internship Details

- Role: Network Security & IT Infrastructure Intern
- Duration: 3 Months
- Start Date: May 15, 2026
- Mode: On-site / Physical
- Stipend: Initially unpaid (performance-based stipend eligibility)
- Reporting To: Network Security & IT Infrastructure System Engineer

Scope of Work

The internship includes practical training in Enterprise Infrastructure, Cybersecurity baselines, and Software Administration, covering foundational architecture, access management, defense systems, and automation practices. This training is an integral part of the internship and is fully included within the three-month duration.

During the program, you will be expected to assist in deploying LAN/WAN architecture, configuring network gateways, managed switches, and access points using Cisco and Ruijie CLI/GUI tools. You will support cybersecurity operations by implementing access control lists (ACLs), setting up firewall security policies, securing router configurations, and managing firmware/software vulnerability patching. Additionally, you will handle software lifecycle updates, server/endpoint OS deployment, hardware diagnostics, and enterprise CCTV surveillance integration using secure Ethernet and PoE cabling topologies. You will collaborate with technical teams on assigned security infrastructure tasks and share regular engineering logs.

Sincerely,

Sunil Awale (HR Manager)

Pacific Office Care Pvt. Ltd.
